

## iSolved is available with carrier feeds designed to reduce the time spent communicating changes and updates to benefit carriers

Integrating with third-party benefit carriers can be an enormous time-saver for human resources and payroll departments.

With iSolved and the Data Integration & Audit add-on, you can choose the insurance carriers with which to integrate. The carrier feeds, also called Electronic Data Interchange (EDI) feeds, deliver benefit enrollment information and changes directly to insurance carriers. iSolved also offers Digitized Forms, ensuring the best fit for any company.

Carrier feeds can benefit customers who are adding benefits administration to their iSolved platform or looking for an HCM platform that includes the option to communicate directly with carriers. Since the iSolved platform is a single-source for all data, including all payroll, HR, and time information, employee data doesn't have to be re-entered or imported.

### BENEFITS INCLUDE:

Automation of a time-consuming manual process

Reduced coverage errors

Less setup time for the benefits or HR department
